

WHAT'S NEW

By Brian Fortenbaugh, Assistant Editor

ThermaCELL® Redesigned and Accessorized

IN CELEBRATING 10 YEARS of keeping mosquitoes and biting insects at bay, ThermaCELL has made their Appliance (\$29.99 camo/\$23.99 olive) more user-friendly. The new ergonomic grip and matte finish give it a better feel in your hand while making it less conspicuous in the field. The On/Off button is now quieter so you don't have to worry about turning it on or off when game is nearby. It's 7.5" long, 3" wide at the top (1.5" at the bottom), weighs 7.1 oz. with a butane fuel cartridge, and creates a 15' x 15' bug-free zone. ThermaCELL has a new accessory for the appliance. The All-Purpose Swivel Light™ (\$8.99) has eight LEDs (four green, four white) and attaches to all full-size Appliances. Beam distance is 15' and battery life is 30 hours. Contact: ThermaCELL, 1-8-NO-SKEETERS, www.thermacell.com.

Silence Your Stickbow

From Stiktamer.com™ comes two products that will make your traditional bow whisper quiet. Stiktamers™ (\$19.99), made from a hybrid foam rubber, deaden the string slap and limb vibration of your recurve bow. They also keep sticks and debris from getting caught in the string crease and protect your bow's finish when hanging it on a bow hook. To

further silence your recurve or longbow, attach a set of the company's Flatliners™ (\$19.99) to your string. Also made from hybrid foam rubber, they don't soak up water so they work in any weather. Contact: Stiktamer.com, (513) 255-7323, www.stiktamer.com.

Become A Better Shot On Moving Targets

The Target Tracker™ improves your accuracy on moving animals while making backyard practice sessions with friends and family a whole lot of fun. The metal frame and rugged tires will

accommodate 3-D targets weighing up to 250 lbs. The remote control has a guaranteed range of 300 yards and is capable of reaching out to nearly a half-mile. The Target Tracker can be steered forward and in reverse, reaching speeds up to 9 mph. Run time on a fully charged battery is 3-6 hours. Targets are not included. Contact: Target Tracker, (248) 770-9678, www.targettracker.net.

PSE® Shortens The Vendetta™

The 29½" PSE X-Force™ Vendetta XS (\$599.99) is a good choice for both ground blind and treestand hunters who want a short, maneuverable bow. The L6 Hybrid Cam System™ has a Posi-Lock™ inner cam that allows you to adjust draw length from 24½"-30" in half-inch increments. The riser's new design provides 25% less deflection and the 6½" brace height makes this bow surprisingly forgiving given its short length. Letoff is 75% and it's capable of arrow speeds in

the 322-330 fps range. It's available right or left-handed in peak weights of 50, 60, and 70 lbs. and in your choice of Mossy Oak® Break-Up Infinity™, Skulz™ Camo, or Black. Contact: PSE, Inc., (520) 884-9065, www.pse-archery.com.

New Bino Series From Carson®

Carson Optical's 3D Series™ (\$340-\$380) binoculars are lightweight and built with your comfort in mind. Four models are available — 8x32, 8x42, 10x42, and 10x50 — each with the High Definition optical coating found in the company's XM-HD™ Series for greater depth and light-gathering capabilities.

The BAK-4 prisms are fully multicoated and phase corrected for clear viewing from edge to edge. The textured rubber armor provides protection and a no-slip grip. They are waterproof/fogproof and come with a BinoArmor™ Deluxe case/wrap, harness system, and neckstrap. Contact: Carson Optical, 1-800-9-OPTICS, www.carsonoptical.com.🐾
